I

AB Mixts. of (a) arom. alkoxylates I (R1 = H or C1-4 alkyl, R2 = H or Me, R3 = H, C1-4 alkyl, C1-4 alkoxy, C1-4 alkoxy-carbonyl, Ph, or condensed benzene rings; R4 = Z1 of H, Me, and Ph; R5 = H, m = 1-3, n = 6-100), (b) I [R1-4, m, n = same as above, R5 = ZX, Z = SO3-, SO2-, or PO32+, X = Li+, Na+, K+, NH4+, HOCH2CH2NH3+, (HOCH2CH2)2NH2+, (HOCH2CH2)3NH+, with 2 cations when Z = PO32+], and (c) nonionic surfactants are used as colorant dispersants in dyeing or white-tinting polyester fibers and blends of polyester fibers and wool, cotton, acrylic fibers, or polyamide fibers with water-insol. colorants. These surfactant mixts. are useful for replacing anionic surfactants such as lignin sulfonates and lignin sulfates in this process.
